# Views

**Normal View** includes panes for your presentation's outline, the current slide, and any notes for that slide. You will probably spend more time in Normal View than in any other view.

**Slide Sorter View** displays all the slides in your presentation as *thumbnails* (itty-bitty pictures). Use Slide Sorter View when you want to rearrange the slides in your presentation and add transition effects between them.

**Slide Show View** displays your presentation as an electronic slide show. Use Slide Show View when you want to deliver your presentation.

# Outline and Slides Tabs

## Outline Tab

This tab focuses on the content of your presentation instead of its appearance. Use this when you want to develop your presentation and add large amounts of text.

## Slides Tab

This tab displays the slides in a presentation as thumbnails, making it easy to navigate through slides in your presentation. You can also rearrange, add, or delete slides here.
